- 1.3 It is Your sole responsibility to determine whether Your .eus domain name registration and use complies with this Registration Policy.

### **2. Definitions**

- b. “**General Availability**” means the general registration period commencing after the launch phases during which available .eus domain names will be generally made available to all registrants that are qualified to register domain names on a first-come, first-served basis, under the process described in the .eus general Registration Policy.
- c. “.eus general Registration Policy” and/or “**Registration Policy**” means the policy available at the Registry Operator’s website at <http://domeinuak.eus/en/araudia> and hereby incorporated by reference, which governs the registration of .eus domain names.

- j. “**TLD**” means Top-Level Domain.

### 3. General conditions and Launch overview

3.1 To register a .eus domain name during Launch, the application must comply with

- 1) The specific eligibility requirements set forth in this Launch Policy for each launch category, as well as with
- 2) The general eligibility requirements and terms of use set forth in the .eus Registration Policy, hereby incorporated by reference. Specifically, to register and renew a .eus domain name the Registration Policies require that You must be an individual or legal entity with with a nexus to the .eus community at the time of registration and thereafter.

Registrations under the .eus TLD are restricted to those fulfilling these two requirements:

- a) bona-fide membership of the Basque linguistic and cultural community on the Internet. The community consists of those who use (or commit to use) the Basque language for their online communications, and/or promote the different aspects of Basque culture online, and/or intend to specifically address their online communications and services to that community.
- b) subject to the further requirement that the registrant's actions in the Basque linguistic and cultural community, as well as the registrant's use of the registered domain name, must be:
  - (i) generally accepted as legitimate; and
  - (ii) beneficial to the cause and the values of the Basque linguistic and cultural community; and
  - (iii) commensurate with the role and importance of the registered domain name; and
  - (iv) in good faith at the time of registration and thereafter.

Registrants are required to state their intended use of the registered domain name. A false statement of intended use is an indication of bad faith and can be the basis for the suspension of the domain name.

Upon registration and during all the life of the .eus domain name You must be able to demonstrate either of the aforementioned fields is applicable to You. Community nexus is subject to post-validation by way of an extensive compliance program based on the same criteria that form the basis of the TLD.

The strength of the validation will be kept in line with the importance of the underlying domain name base on the assumption that an average user would reasonably make in the context of that domain name.

The .eus General Registration Policy will apply to all aspects of Your registration not specifically contemplated in this Launch Policy.

3.2 As an exception to the eligibility registration requirements described in 3.1 above, TMCH validated applications which do not comply with the .eus community based registration policies may opt for a defensive registration that will block the registration to any potential third party applicant without the activation of the domain in the DNS, as described in 4.1.3 below.

3.3 The Launch Phase for .eus will start on September 16th 2014 13:00 UTC and will end on November 18th 2014 13:00 UTC, except for the Public Interest LRP that will end on November 25th 13:00 UTC\*. This will be followed by a cooling off period before the start of the General Availability period, on December 3rd 13:00 UTC. During this 71 calendar day period, six categories of applications will be accepted: five categories for registrants with prior rights, and one additional category for applications without prior rights (*Landrush*). Applications for **all these 6 categories will be accepted simultaneously** and will be **allocated at the end of the Launch Phase** window according to the hierarchy of **priority status** of each category. Thus, each category will be completely allocated (i.e. accepted, rejected or sent to contention resolution) before any name on the next category is allocated. Each claim of priority will be individually and **thoroughly validated** by the Registry Operator. Self-declaration will not be sufficient. The categories are the following, according to priority status (from top-priority to lesser priority):

## 4. Priority 1 Category: End-Date Sunrise

These requirements are in addition to the the nexus to the .eus community as defined in 3.1 above, as well as to any other general requirement applicable to all .eus registrations, as set forth in the .eus Registration Policy. No other requirements (e.g. trademark class) will apply.

### 4.2 Validation

TMCH-registered trademarks: The Registry Operator will only register the domain name applied for insofar and to the extent that:

- a. The domain name meets the general eligibility criteria set out in the .eus Registration Policy;
- b. The domain name corresponds exactly with a trademark validated, upon request of the applicant, by the Trademark Clearinghouse for Sunrise Services;
- c. a valid SMD file is submitted at the time of application;
- d. the application matches a label contained within the SMD file;
- e. and the domain name is available.

No other requirements (e.g. trademark jurisdiction, trademark class or local presence) will apply.

#### **4.3 Duration**

This Sunrise Period will last sixty-four (64) calendar days and it will run in parallel with the rest of the Launch Phases.

#### **4.4 Contention Resolution**

The following process will apply:

1. Agreement between contenders (withdrawal and refund of application);
2. If no agreement, the parties will be offered mediation arbitration or random selection (if all contenders agree); and
3. Auction, as a tie-breaker of last resort, if no agreement reached over any mechanism above.

## **5. Priority 2 Category: Defensive Registrations**

### **5.1 Eligibility and Name Selection Requirements**

TMCH validated applications which do not comply with the .eus community based registration policies may opt for a defensive registration. This defensive registration will block the possibility to register the domain name by any potential third party applicant in the phases with lesser priority. Defensive registrations will not allow the activation of the domain in the DNS. Multiple defensive registrations from different applicants may be accepted.

## **5.2 Priority**

Applications eligible under this category will prevent eligible Priority 3, 4 and 5 Category and Landrush applications over the same domain name.

## **5.3 Duration**

This Sunrise Period will last sixty-four (64) calendar days and it will run in parallel with the rest of the Launch Phases.

## **6. Priority 3 Category: Public Interest LRP**

This Category is for legal entities with a specific remit to promote the Basque language and/or culture. Only those applicants proving this specific remit in promoting the Public Interest of the .eus Community (including the relevant Public Authorities with competence in the areas where Basque is an autochthonous language) will be allowed to register names subject to the Eligibility and Name Selection requirements set forth below.

A list of authoritative publicly available resources where some of the entities considered as having a specific remit in promoting the Public Interest of the .eus Community is attached as Annex 1 to this Launch Policy.

- (iv) their **registered trademarks**.

Public Authorities referred to in 2.1 f) above may also register the following names:

## **6.3 Duration**

The Public Interest LRP will last seventy one (71) calendar days and it will run in parallel with the rest of the Launch Phases.
